

TECHNICAL DATA SHEET

MP-888MW

MP-888MW is specially used in digital printing as glossy white ink. Specially developed for high functional ink for digital print machine for textile printing.

Feature:

- Highly efficient for digital printing machine.
- Impart Glossiness & whiteness to printing ink & create beautiful design.
- Non -toxic.
- Cost effective

Basic Properties:

Appearance	White Paste
pH Value	7-9
Solubility:	Soluble in Water

Application process:

Standard recipe White

For Reduce BC 200	900 gm
MP-888MW	45 gm
Solvent	55 gm
<hr/>	
Total	1000 gm

Printing → Drying → Curing

Fixation with steam should be carried out for 4 – 5 minutes at a minimum of 160°C. This method also produces a good standard of fastness, but somewhat below that of prints fixed with hot air.

Shelf life:

The Printing ink paste can be kept in the sealed containers at temperature under 32°C at least 6 months. If the drum is opened then it should be used quickly.

N.B - The drum should be close tightly after use the paste or ink. MP-888MW should be stored under frost-free conditions.
