

TECHNICAL DATA SHEET

Binder-ForBind P-50

Primary Form of acrylic Polymer

Binder-ForBind P-50 is an aliphatic waterborne polyurethane resin with high solids content, high elasticity, good resistance to washing and flatness without warping.

Basic Character:

Appearance	White Liquid
pH Value	7.0-10
Solubility:	Miscible

Characteristics:

It can be used in shoe materials, textile and other fields, especially suitable for high elasticity swimwear fabric.

- High solid content
- High elasticity, the addition of Crosslinker does not affect the elasticity
- Water washing resistance
- High gloss, full film

Use:

Add 0.5%~1% crosslinker and bake at 100-130°C for 1min.
